

**Frequently asked questions:**

**KMDB's Mechanical Disc Brake**  
 Now available

**1600kg**  
 45x45 solid axle  
 114 PCD 5 Stud

**2700kg**  
 50x50 solid axle  
 140 PCD 6 Stud

**Technical Info on the Disc Brake:**

- Cast steel - En19 - Electro-galvanized finish
- Supplied as a complete ready to install axle with brake rods
- Fully mechanical calliper - **No pistons/brake fluid required**
  - SABS Tested - Patented globally
    - Braking Torque of 2100Nm
    - Simple brake pad replacement
- Works on the same over-run system as the drum brake
  - Requires leaf spring suspension
- Superior braking to any other mechanical alternative
  - Price is constant regardless of axle length
    - Works with any coupler\*

\*The Disc brake does not contain a reverse mechanism. Couplers with a reverse plate are necessary to lock the shaft for reversing. Alternatively, KMDB supplies a coupler with solenoid for hassle free automatic reverse. Contact our office for more information.
